Data analytics professional with a Master's in Data Science and Analytics and experience building data pipelines, predictive models, and executive dashboards that support strategic decision making. Skilled at translating complex data into clear, actionable insights through statistical analysis, visualization, and automation. Seeking to leverage advanced analytics and AI to drive data-informed decision making.

WORK EXPERIENCE

Business Intelligence Analyst – Automation, *Unum*, *Atlanta*, *GA* *March 2026 – Present*

- Built shared data resources across the finance organization using Teradata SQL, creating a single source of truth for multiple recurring reports.
- Automated manual Excel workflows, saving 200+ hours of monthly processing and reducing reporting errors.
- Designed Tableau dashboards that gave leadership new visibility into claim trends and expense drivers.
- Applied machine learning to complex financial datasets to identify cost-saving opportunities, informing pilot programs for expense reduction.

Senior Analyst – Treasury, *Floor & Decor*, *Atlanta*, *GA* *May 2023 – August 2025*

- Designed and deployed ETL pipelines that automated reporting workflows and improved operational efficiency, saving 100+ hours of manual work annually.
- Built bottom-up forecasting models using linear and non-linear techniques to support financial planning.
- Delivered data-driven insights and strategic recommendations to senior leadership.

Systems Analyst – Treasury, *Inspire Brands*, *Sandy Springs*, *GA* *Winter 2022 – May 2023*

- Managed treasury software and database administration, leading upgrades, access governance, and audit support while serving as subject matter expert on core treasury systems.
- Collaborated with accounting and IT to develop automation and technical solutions, including database design, treasury system upgrades, and Oracle Cloud data workflow integration.

CERTIFICATIONS

Data Science in Healthcare, *Dartmouth Quantitative Biomedical Sciences*, *Geisel School of Medicine*

- Built projects to improve diabetes patient outcomes using data wrangling and visualization, linear and logistic regression, principal component analysis, Bayesian statistics, and social network analysis.

Artificial Intelligence Business Innovation, *Georgia State University*, *Robinson College of Business*

- Graduate certificate in Artificial Intelligence specializing in Generative AI, RAG pipelines, and agent-based system design, with hands-on development of LLM-driven applications.

EDUCATION

Master of Science in Data Science and Analytics, *Georgia State University*, *Atlanta*, *GA* *December 2025*

Bachelor of Business Administration in Economics, *Mississippi State University*, *Starkville*, *MS* *December 2021*

RELEVANT SKILLS

- **Process Automation:** PowerShell and Batch scripting, cloud processes with Power Automate and Azure
- **Databases:** Complex SQL queries, MongoDB, Neo4j, Qdrant
- **Artificial Intelligence:** Prompt engineering, RAG, agentic workflows
- **Deep Learning:** Bag of words, TF-IDF, n-grams, SVM
